

Warmer & Packaging Station **Model FAST Unit**

The Food Assembly Station (FAST unit) serves as a warming unit to hold freshly prepared product, as an assembly station to assemble and package food for customers and as a storage area for packaging and supplies.

The warming unit comes standard with three (20-3/4" L X 12-3/4" W X 4" D) pans, but you can customize this configuration using different sized pans to best suit your individual needs. The pan well is thermostatically heated and the top section uses heat lamps for additional heating and for greater visibility. The dual heating sources allow you to precisely maintain the proper temperature of your products, so your customers will get fresh, hot food every time.

The FAST unit is designed to expedite food prep and assembly and provides you with everything you need to assemble and package products quickly and easily. Easy access from both sides allows for maximum efficiency during peak service hours. The assembly area is equipped with two 10" x 45" Teflon cutting surfaces for that can easily be removed for cleaning. And, the storage area is designed to house all of the packaging and supplies required to package your products for delivery to customers.

Design Features

- Two serving sides allow for maximum efficiency during peak serving hours.
- Hinged lexan door on each side allows for easy access and visibility of the cooked product.
- Thermostatically controlled product well allows the product to stay fresh and hot at all times.
- Adjustable heat lamps help provide heat and greater visibility for products.
- Teflon cutting surfaces allow for product assembly and are removable for ease of cleaning.
- Adjustable shelves and dividers allow you to customize the storage area to fit your specific needs.
