

Ventless Hood

Model OVH-10

- The compact and simple design of the ventless hood eliminates the need for expensive roof modifications and the hassle of dealing with multiple vendors for separate hood and electrical systems.
- Our one-of-a-kind, stainless steel recirculating hood, for use with specific UL listed appliances, incorporates our patented Electrostatic Air Cleaner and provides vapor removal requirements for a variety of food service applications and equipment.

Design Features

Ventless Hood System

This Ventless Hood consists of a Three-stage Air Purification System.

- Stage 1.** A Stainless Steel Baffle Filter traps large grease particles.
- Stage 2.** An Electrostatic Air Cleaning Filter (EAC) uses ionizers that charge particles of dirty air, allowing them to be collected by an electrostatic force.
- Stage 3.** A Disposable Charcoal Filter helps eliminate odor.
- Stage 4. (Optional)** Ultra Violet light helps eliminate any remaining grease laden air. (Not shown)

Appliance Constrains

Equipment Type	Max. Input Power (kW)	Clearances
Ovens	11.5	6" [153mm] maximum from hood skirt bottom to door top. 1" [25.4mm] minimum from hood skirt bottom to oven top. 6" minimum hood skirt over hang to heated oven opening.
Conveyor Ovens	11.5	30" [762mm] maximum from hood skirt bottom to top of conveyor belt. 1" [25.4mm] minimum from hood skirt bottom to oven top. 6" minimum hood skirt over hang to heated oven opening.
Rotisseries	6.2	6" [153mm] maximum from hood skirt bottom to door top. 1" [25.4mm] minimum from hood skirt bottom to oven top. 6" minimum hood skirt over hang to heated oven opening.

Note: To be used with electric appliances only.

We have specifically developed the OVH-10 for many appliances, please see following Order Sheet or contact us to see if we have developed one for yours.
